Experience

-  **MetabolismFun - Full-stack Web Engineering**
 - An online, educational game created to teach cellular metabolism at a university level.
 - Worked with Dr. Neocles Leontis to develop the game for his class; I was responsible for programming, design, and hosting.
 - Features a playable turn-based game forcing the player to learn metabolic pathways to maximize certain outputs, customizable settings, saved games, and a flat, smooth appearance.
-  **Personal Robotics - Intern; Android Development**
 - Designed an Android application for in-house use on a humanoid robot that simplified normally difficult tasks such as adjusting motor position, displaying sensor output, or sending a direct command.
-  **Agile Oasis Technologies - Intern; General Web Development**
 - Worked on a variety of projects, generally designing and building the frontend for contracted websites.
-  **Game of Life - Independent Project**
 - A simulation of Conway's Game of Life, developed in Java to run on a desktop computer.
 - A game as much as a tool, the program allows users to work on an infinite grid, place predefined patterns, and watch cells evolve over time.
